Kyoko Kusakabe

Professor, Department Head Department of Development and Sustainability

Kyoko Kusakabe is a professor of Gender and Development Studies at Department of Development and Sustainability, School of Environment, Resources and Development, Asian Institute of Technology in Thailand.

She has over 20 years of experience in research and teaching gender and development in Asia especially focusing on the Mekong Subregion. Aside from her academic work, she has experience in working with NGOs and government organizations for gender mainstreaming and integration of gender issues. Her research focus is on gender issues in labor/ work, especially on labor migration, garment factory workers, informal employment, and agriculture and fisheries. She was a gender expert on regional urban environmental management project supported by the Canadian government and also currently leads a research project on gender mainstreaming guidelines for regional marine plastic management of the World Bank. She has published/edited 5 books, over 50 journal papers, over 20 chapters in books, over 20 monographs, and managed over 40 projects as PI/ co-PI. She is a co-author of Thailand's Hidden Workforce: Burmese Migrant Women Factory Workers (Zed Books, 2012, co-authored with Ruth Pearson) and co-edited Fisherfolk in Cambodia, India and Sri Lanka: Migration, gender and well-being, (Routledge, 2020).

Madeline Schneider

Senior Manager Berlin und Umgebung, Deutschland and one of its lead authors and NKE to SWITCH-Asia SCP

Madeline Schneider works as a Senior Manager in the field of energy at adelphi since 2016, with a particular focus on sustainable

buildings and energy efficiency finance in developing and emerging economies. For instance, she supports the German Development Cooperation (GIZ) in strengthening the institutional and operational capacities of selected Indian smart cities in the field of sustainable urban development and advised the Bureau of Energy Efficiency (BEE) on the development of an energy conservation building code for residential buildings in India. Moreover, she prepared a scoping study on the current state and trends of sustainable consumption and production in sustainable housing in Asia to identify key topics with the need for action. Prior to joining adelphi, she supported the development of innovative climate finance instruments and suitable measures for efficient emissions reduction at GIZ in New Delhi, India. While working as a research assistant at the Chair of Industry, Energy and Environment at the University of Vienna, she enhanced her expertise on energy and environmental management. Madeline holds a master's degree in International Business Administration with a specialization in international energy and environmental management from the University of Vienna.
